

To whom it may concern,

I am an XM radio "Subscriber" - Meaning that I PAY REAL MONEY for a service. I am disturbed to hear that the FCC is moving to try and limit XM Radio's ability to provide me with a service that is not only helpful, but also necessary for many of the commuters in my area. By providing Traffic and Weather it enables me to plan my day around the climate in my local area, and avoid any roads that are congested. I do not see how this service breaks any FCC rules. Furthermore, I feel that since I pay for this service you should not have any say in what services they are to provide me. PLEASE STOP YOUR ILL ADVISED PETITION!!!!

Thanks for your time,
Eric Van Tongere
XM Subscriber
